

The Hive Mortgage Solutions Swarm “Start With A Real Mortgage” Program

In the life of a Honeybee, “swarming” is when the existing Queen and about half of the mature honeybees leave their existing hive to find a new home. The bees that stay behind create a new Queen and life goes on. This is how bees have survived for millions of years. They basically outgrow their current space and need a new home.

The Hive Mortgage Solutions SWARM Program is designed to help you “swarm”. Move out of a house that is too small, move out of your rent, or out of your parent’s basement and into your new home. It all starts with a mortgage. A mortgage is the key and getting prepared is necessary. When a bee hive swarms, it is a process. The bees will start the process of creating new queens, they prepare the brood, and scout bees will leave ahead of the swarm looking for a new place.

As someone who is looking to SWARM, you should be prepared. You should know what you can afford. You should know what is on your credit report. You should know what program best meets your needs. You should know what to expect for a down payment, and how much you will need to closing costs.

We work with a variety of lenders and offer USDA, FHA, VA and Conventional loans. The purpose of the SWARM program is to help you achieve your goal of home ownership. We are not a credit repair company and we cannot make a guarantee, but we can provide a plan of action that will prepare you and put you in the best position to make your dream a reality.
